---

Gentlemen:

To date, Creamer, through their subcontractor, has successfully tested 6 out of the 10 tie rods. This includes all of the tie rods in the "waler repair" area. Given that the tests have all passed to date and the testing subcontractor has conducted the tests to RA Consultants' satisfaction, we do not feel it is necessary for the Group's geotechnical consultant (RA Consultants) to be on site tomorrow. Therefore, RA Consultants are not planning to return to the site, unless a technical issue arises with the repair of the sheet pile wall requiring their attention.

Any questions, please do not hesitate to call.

Talk to you soon.

Regards,

**Joseph P Vitale, PE, LSP**
